DETAILED ACTION

Ex parte Quayle

1. This application is in condition for allowance except for the following formal matters as noted below.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the ball bearing of claim 8, the roller bearing of claim 9, and the inclination of the handle or the pressing to obtain the inclination in either of claims 10 or 20 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet,

Art Unit: 2859

even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There appears to be no disclosure of a roller bearing in the specification for the roller bearing disclosed in claim 9. The specification discloses that other bearing structures can be used and discloses a ball bearing in paragraph [0020], but not specifically a roller bearing.

Claim Objections

4. Claims 10-20 are objected to because of the following informalities:

Claim 10: In (c), line 2, the second occurrence of "pin" should start with --a-- to provide proper antecedent basis.

Claims 10 and 20: The claim language is confusing and this confusion also extends to specification. Specifically, the examiner is questioning if the inclination is caused by hand pressure forcing said inclination or if the bore in the elongated arm for the marking instrument has an incline or a feature to allow inclination. In reading the abstract, it appears to imply that the inclination is built into the bore. However, the claims, the drawings and the paragraph 0028 of the specification appear to indicate that the inclination occurs by the pressure of the hand toward the pivot pin and not by the bore having a slight inclination. It is unclear if any corrections are required, however, clarification is requested.

Allowable Subject Matter

Claims 1-9 are allowable

Art Unit: 2859

Claims 10 and 20 would be allowable if rewritten to overcome claim objections set forth in this Office Action.

Claims 11-19 would be allowable if rewritten to overcome the claim objections set forth in this Office Action and to include all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
